# Extended Networks

---

## About Extended Networks

Extended Networks W.A. Limited is one of the biggest and fastest growing Co-location Service Providers for Mobile Network Operators in Nigeria. They also help Telecommunication companies monitor and maintain their Sites and clusters, which enables mobile network operators to improve services to their subscribers. Trusted by MTN, Airtel, 9mobile etc.

## My Role

UI/UX Design, Infographics design, Email report design and WhatsApp bot extension UX design

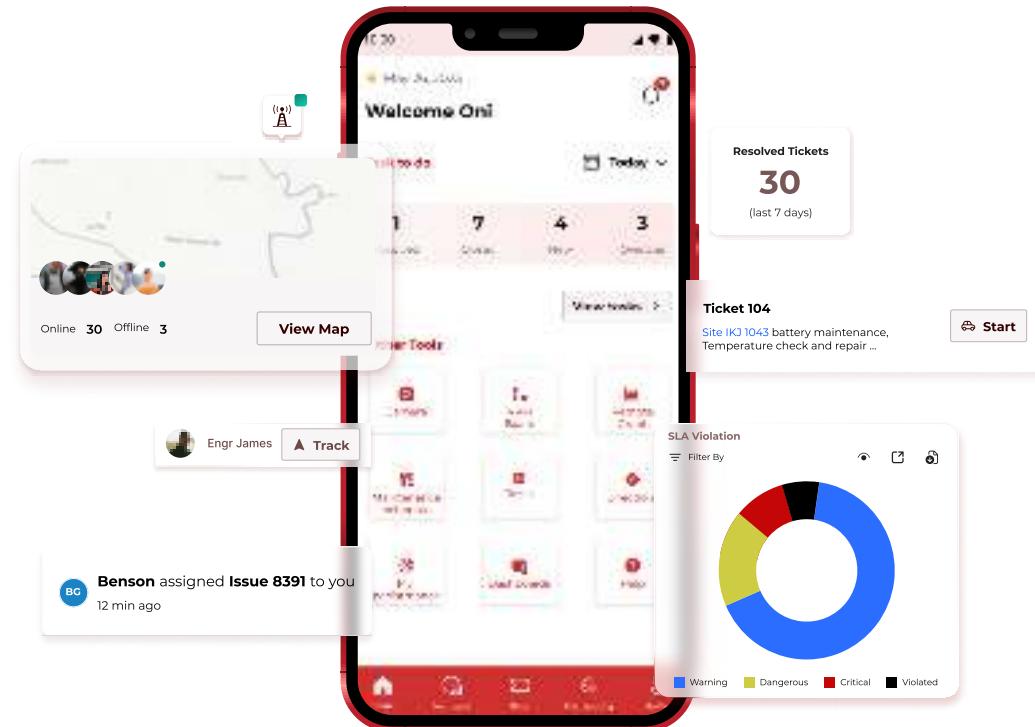

# Overview

The Products for Extended Networks W.A. Limited was aimed to **simplify operations for engineers, Administrators and managers** and also make all operations effective. To do this the following products were designed:

**Mobile application for field engineers, Web application for Site administrators and Managers, Email Reporting, AI predictive Insights, Text Messaging for urgent alerts and WhatsApp bot**

The product helped Site managers and field Engineers monitor their assigned sites remotely and also open and close tickets created by the system or by users.

Sensors are placed on the equipment's and machines at the field / sites that collects data for analysis and generating reports, This data is also collected by Artificial Intelligence for predictive analysis and suggested maintenance schedules.

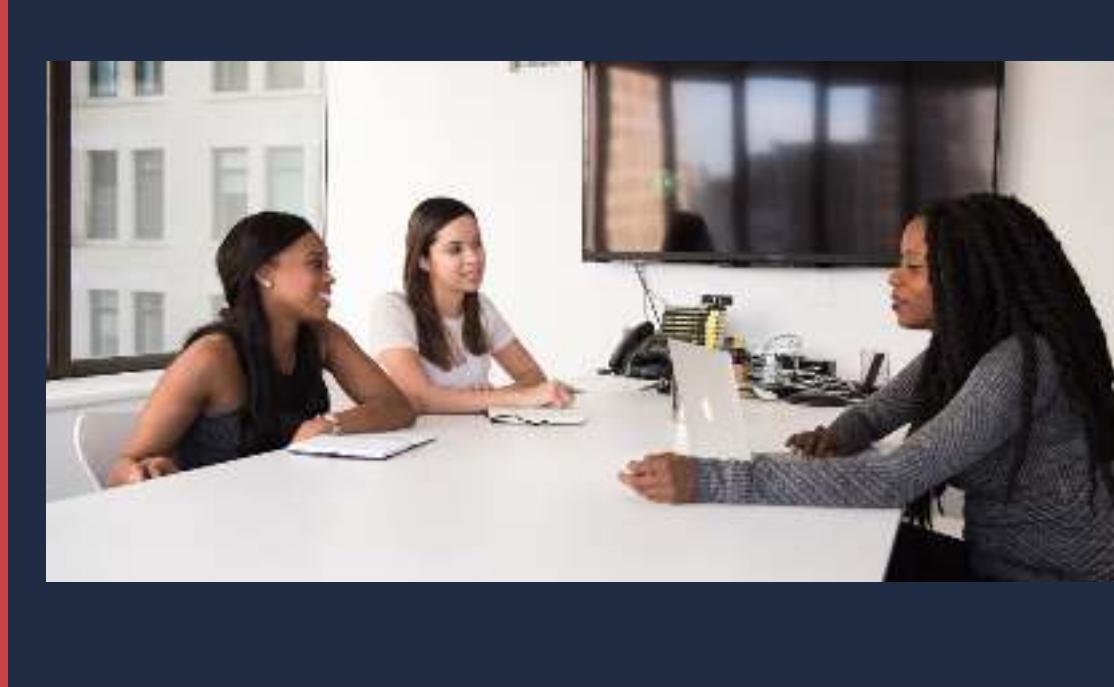

## Solutions

Some of the solutions from the web product includes; live dashboard, insight dashboard, ticketing, planner, etc

The screenshot shows a navigation sidebar on the left with icons for Home, Dashboards, My Dashboards, Shared With Me, and Reports. The 'Dashboards' section is expanded, showing 'Default Dashboard' (selected), 'My Dashboards', 'Shared With Me', and 'Reports'. The main area is titled 'Overview' with tabs for 'Live Dashboard' (selected) and 'Insights Dashboard'. A 'Default Dashboard' card is displayed, featuring a circular donut chart titled 'SLA Violation' with four segments: Warning (blue), Dangerous (yellow), Critical (red), and Violated (black). Below the chart is a legend: Warning (blue), Dangerous (yellow), Critical (red), and Violated (black).

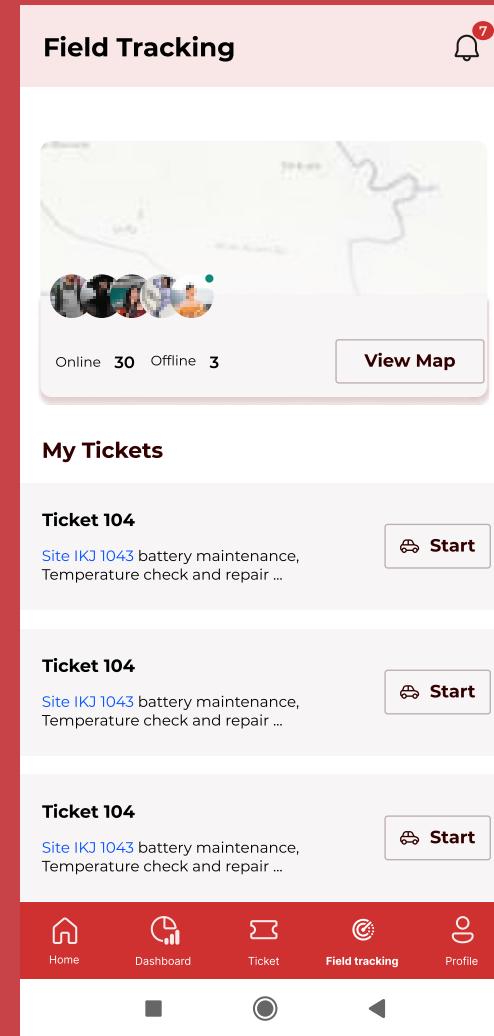

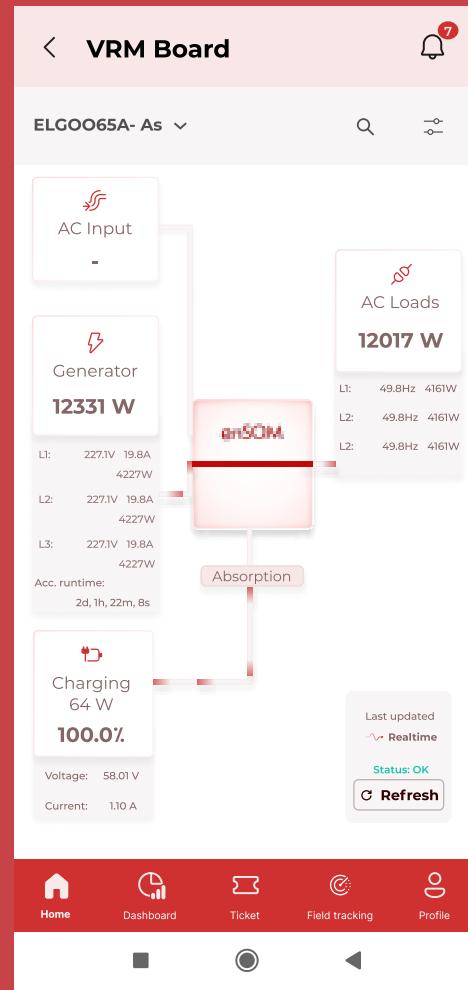

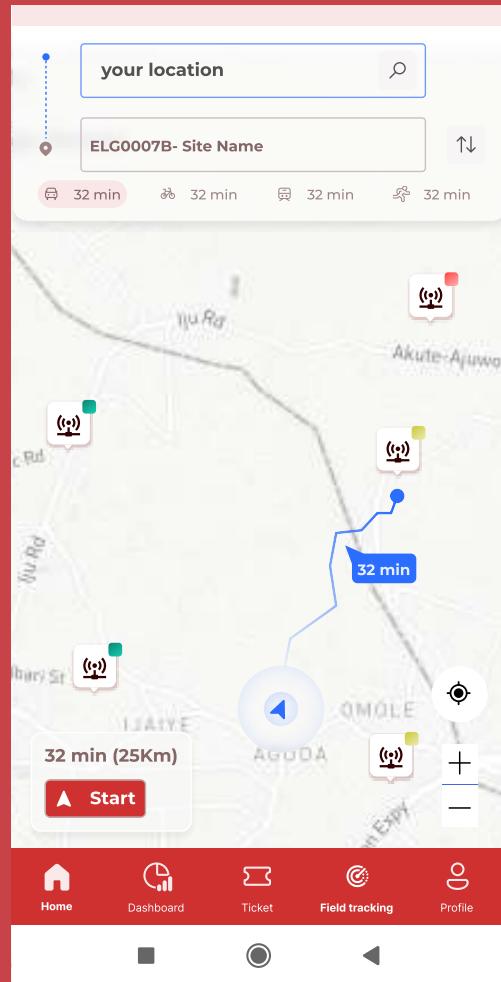

The screenshot shows a navigation bar at the top with 'Overview' and 'Alarms' selected. Below are tabs for 'New Alarms' (23), 'Open Alarms' (120), 'Resolved Alarms' (405), and 'Closed Alarms' (111). The 'New Alarms' section displays two cards: 'Low Battery' (Me) and 'High Voltage' (Me). Both cards include the alarm ID (S09182), issue number (Issue 1092938), a descriptive text about the origin, a 'View More' link, and buttons for 'Share Alarm' and 'Assign To'. The 'High Temperature' and 'High Power' sections follow a similar layout.

The screenshot shows a map with several location markers. A callout box for 'Resolving Ticket 104' provides details: 'Tracking Chioma Rotimi' and 'Est. 1 hr 2min'. It also lists three segments of the route: 'Ajao Estate, Lagos' (9:30AM, 1st June, 2023), 'Powerline' (9:30AM, 1st June, 2023), and another 'Powerline' segment (9:30AM, 1st June, 2023).

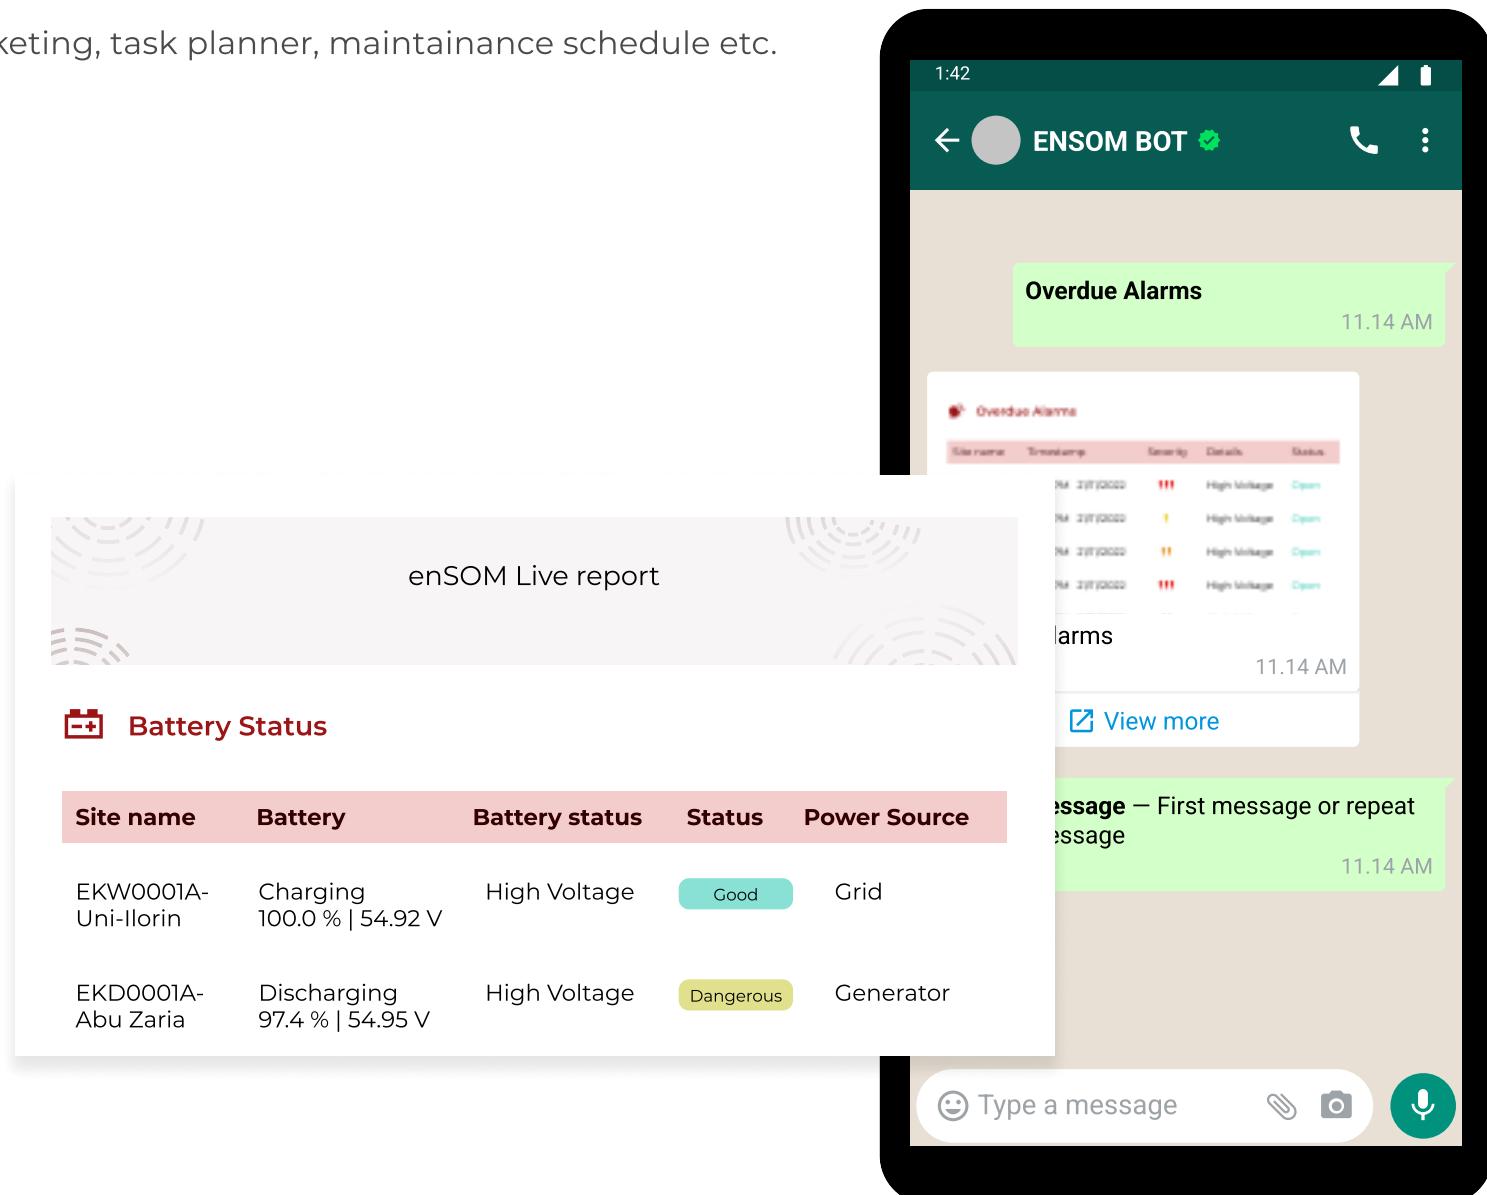

# Mobile Application

The mobile Application was created mainly for field engineers on the go and for managers to track their performance. the features/ solutions includes; field tracking, ticketing, task planner, maintainance schedule etc.

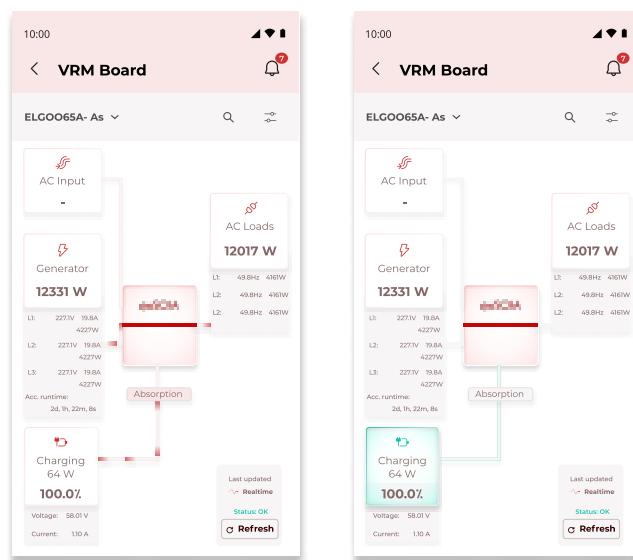

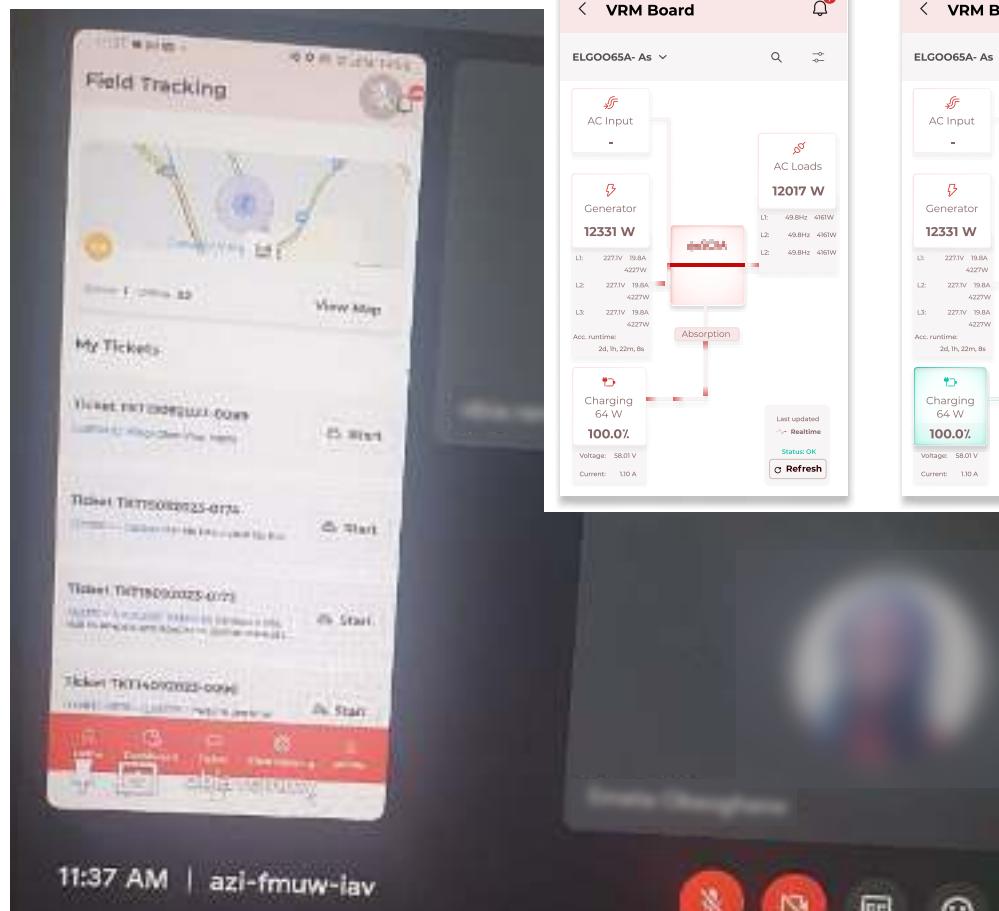

## Whatsapp bot and Email Reporting

The mobile Application was created mainly for field engineers on the go and for managers to track their performance. the features/solutions includes; field tracking, ticketing, task planner, maintainance schedule etc.

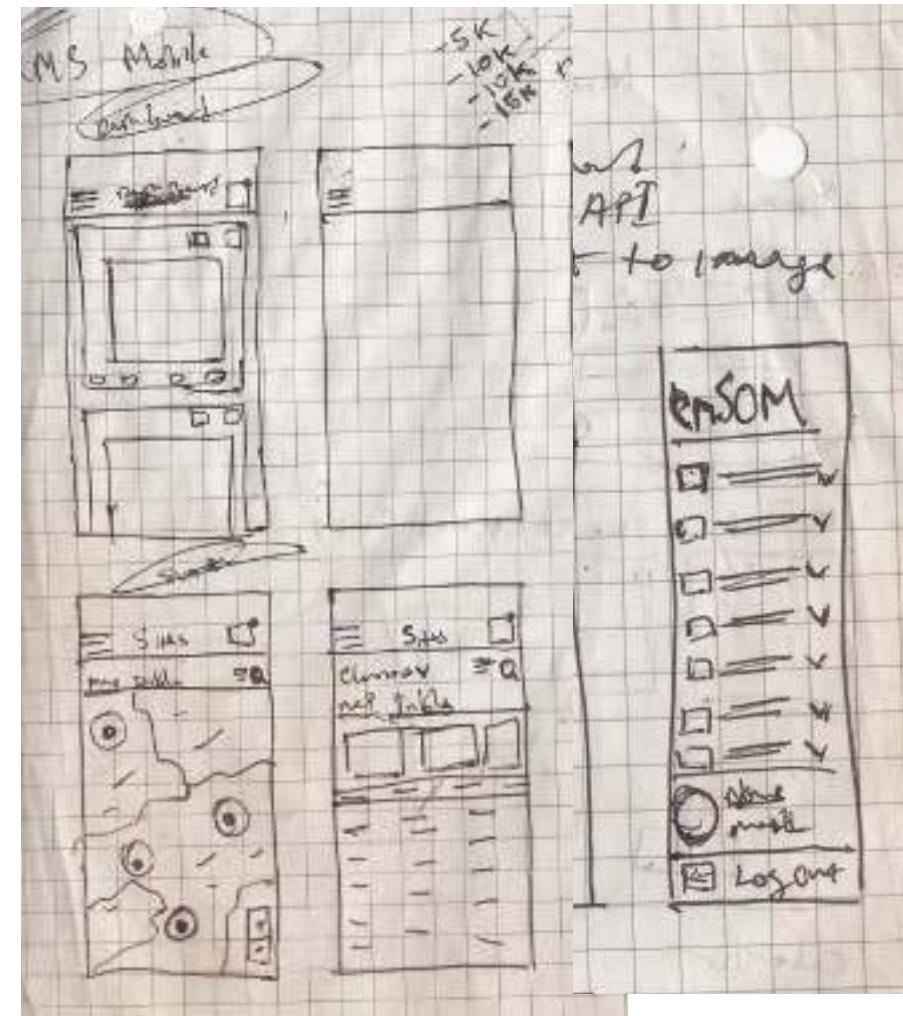

## User Testing / Research

Various research methods were used to collect information and feed back from the users including; in person interviews, Guerilla test, AB Testing and questionaries

## Sketches and Ideation

# 4Earth App

Los Angeles California, USA

2 yrs Contract

## About

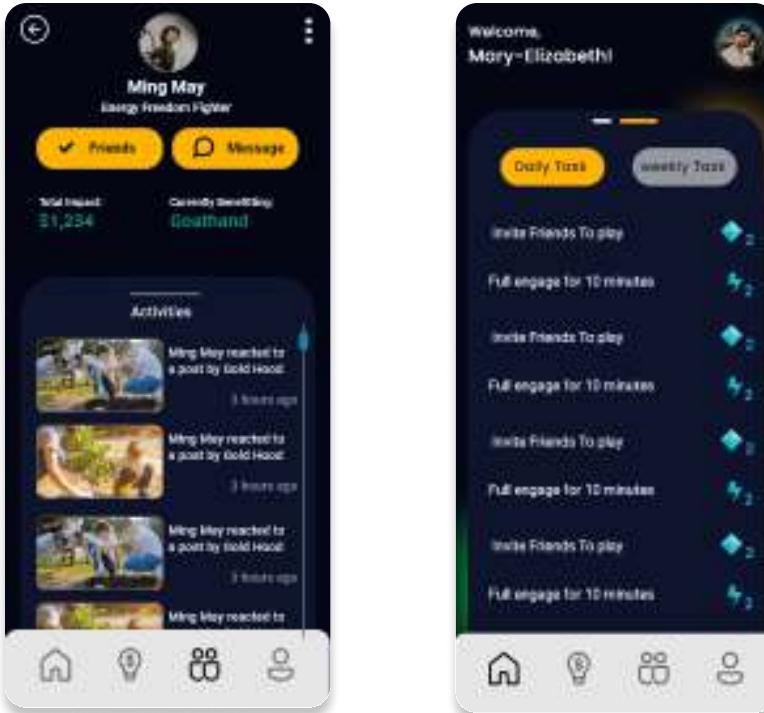

4Earth: The innovative social platform designed to foster connections between individuals, corporations, and NGOs passionate about sustainable development goals. Immerse yourself in a captivating gamified journey where your actions make a real-world impact. By engaging with ads and actively participating, you not only contribute to generating funds for NGOs but also play a pivotal role in the mission to restore and heal our planet.

## Role

Brand Design, Illustration and Marketing design, UI/UX Design

# Overview

The project commenced with thorough **UX research** and data compilation conducted by both the UX team and the Chief Data Officer. Subsequently, **wireframes** were meticulously crafted and showcased to stakeholders. This was succeeded by the development of **high-fidelity designs and prototypes**.

Other design projects include the establishment of an **Admin section** dedicated to messaging and reporting. Furthermore, it involved the creation of impactful **landing pages** catered to the requirements of the marketing team.
